Components:

As below, our App.jsx, which uses components to create the page.

```
index.html App.jsx X
rc > App.jsx > ...
5 import Footer from './components/Footer';
6 import { articles, tutorials } from './data';
7
8 export default function App() {
9   return (
10     <>
11       <HeaderBar />
12       <Hero />
13       <CardGrid title="Featured Articles" items={articles} />
14       <CardGrid title="Featured Tutorials" items={tutorials} />
15       <Newsletter />
16       <Footer />
17     </>
18   );
19 }
20
```

Then as below the rendered webpage:

600 × 400
